

Frontend Developer Coding Challenge

Time : 1 day

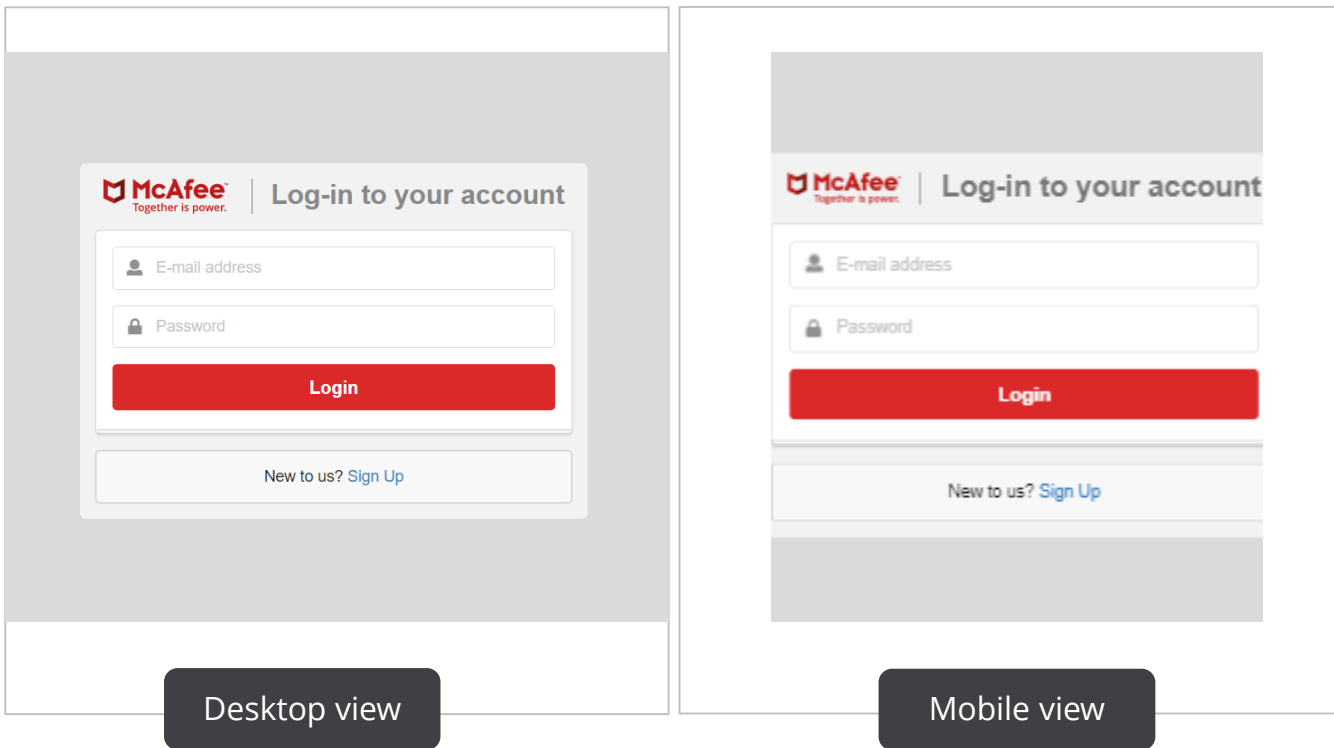

Consumer

McAfee Confidential

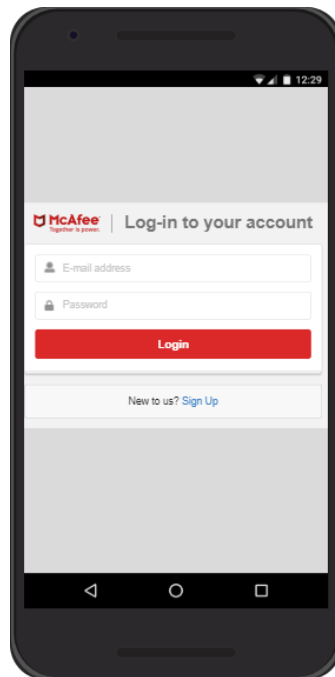

Design

Refer design/mockup files from *screens* folder

Design (continued...)

Mobile Device View - with error and without error.

Requirement

1. Develop the login page using HTML5 / CSS3 / JS.
2. Make it mobile & tablet responsive using your best judgement.
3. Create an interesting hover effect for the images / thumbnails / links / buttons.
4. Add appropriate validation checks for form fields(Where ever applicable).
5. Use following REST API for implement login functionality.
 1. <https://reqres.in/>
 2. <https://reqres.in/api/login> (Login)
6. Make the page the smallest possible size - ensure that HTML, JS and CSS are properly optimized, compressed, minified etc for quick page loads.
7. Optional bonus task 1 : Use bootstrap for making the page responsive.
8. Optional bonus task 2: Use BEM (Block Element Modifier) methodology for CSS coding – Refer the code guide line(Refer folder *coding-guide*) for further information.

Supported browsers
